

# SDLC - TASK-1

SHAAN ROUT

2141018101

Objective : Create a simple use-case diagram for a library management system.

Library management system is a software that helps manage the daily activities in a library, like issuing books and managing members.

These are two main actors :

- Librarian : manages book checkout
- Member : borrows and returns book

main cases include :

- check out Book : Done by both librarian and member.
- Return Book: Performed by member,
